Career Objective

Third-year B.Tech student specializing in Internet of Things (IoT) at K L University with a strong interest in Full Stack Development, IoT Engineering, and Artificial Intelligence/Machine Learning. Seeking opportunities to apply programming and development skills, build practical solutions, and grow as a software developer.

Education

K L University, Vaddeswaram **2024 – Present**
B.Tech in Internet of Things (IoT)

- CGPA: **8.15**
- Currently pursuing 3rd Year

Intermediate / 12th Standard **84.67%**
10th Standard **80.10%**

Technical Skills

Programming	Java, Python, C
Web Technologies	HTML, CSS, JavaScript
Backend	Spring Boot, REST APIs
Database	SQL, MySQL
IoT	Internet of Things, ESP32, Arduino, Sensors, Embedded Systems
AI / ML	Artificial Intelligence, Machine Learning, Computer Vision, Few-Shot Learning
Tools	Git, GitHub, Eclipse, MATLAB, Google Colab, Postman
Concepts	OOP, Data Structures, Algorithms, DBMS, Computer Networks

Internship Experience

Web Developer Intern – Glow Logic **3 Months**

- Worked on frontend and backend web development activities.
- Gained practical experience in developing and structuring web pages.
- Applied programming and web development concepts to practical tasks.
- Learned the basic workflow of developing web applications and integrating frontend and backend components.

Projects

BookHub – Full Stack Online Book Store

- Developed a full-stack web application concept for browsing and managing books.
- Designed frontend and backend components for a structured online bookstore.
- Focused on book listing, user interaction, and efficient data management.

IoT-Based Smart Water Resource Management

- Developed an IoT-based solution for monitoring and managing water resources for agriculture.
- Worked with IoT hardware and sensors to support efficient water-resource monitoring.
- Designed the system with a focus on practical monitoring and improved resource management.

Few-Shot Learning for New Product Defect Classes

- Developed a machine-learning project focused on identifying new product defect classes using limited training examples.
- Explored few-shot learning and computer vision concepts for defect classification.
- Worked with Python and machine-learning concepts for experimentation and model development.

Robotics and Artificial Intelligence

- Worked on a project combining robotics concepts with artificial intelligence.
- Explored the use of intelligent systems for practical robotic applications.

Leadership & Activities

- Active contributor to the **innoIoT Club** at K L University.
- Participated in organizing and supporting technical events related to IoT and emerging technologies.
- Involved in technical activities, workshops, project demonstrations, and student engagement.

Certifications & Training

- Full Stack Java Internship – Glow Logic
- Web Development Training / Practical Experience
- IoT and Embedded Systems Project Experience
- AI/ML and Few-Shot Learning Project Experience

Relevant Coursework

Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Computer Networks, Internet of Things, Artificial Intelligence, Machine Learning, Web Development, Software Engineering.

Career Interests

Full Stack Java Development — IoT Engineering — AI/ML — Software Development — Prompt Engineering

Strengths

- Problem-solving and logical thinking
- Quick learner and technology enthusiast
- Team collaboration and communication
- Interest in building practical projects
- Willingness to learn new technologies

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
